CRITICAL ACCESS HOSPITALS

YOUR SMALL HOSPITAL IS A BIG DEAL TO US

Juno Health® provides a cloud-native acute care solution with everything your Critical Access Hospital needs right out of the box. Its streamlined design cuts down on frustrations and frees healthcare providers to spend more time with their patients and less time charting. It is an affordable, user-friendly solution that is built BY clinicians FOR clinicians.

Our modern, ONC certified EHR is designed with HL7 FHIR APIs as a starting point—not a retrofit. It is USCDI compliant to support true interoperability and clinical integration throughout your enterprise. With our single tenant deployment, you are not tied to other organizations, and our simplified, accelerated implementation results in lower costs and a shorter time to value.

At Juno Health, we understand the unique challenges of rural healthcare and are ready to help you overcome them.

THE JUNO EHR FOR ACUTE CARE DIFFERENCE

These powerful, flexible features make it easier and more efficient to provide excellent care, achieve better patient outcomes, and sustain the vital services your community depends on.

REVENUE CYCLE MANAGEMENT

Capture every dollar without paying percentage-based fees. Get seamless integration and unsurpassed flexibility with an RCM solution purpose-built to provide complete autonomy and automate revenue-related tasks, while identifying underpayments and denials and providing actionable remedies.

EMERGENCY DEPARTMENT

Say goodbye to downtime, complex workflows, and integration headaches. Our Emergency Department solution makes handoffs to inpatient systems effortless, has a dynamic, ED-specific documentation interface, and works on any web-connected device.

SURGERY MANAGEMENT

Simplify perioperative care with integrated Order Management, eMAR, Scheduling, and Registration. Built on AORN Syntegrity standards, Juno EHR's Surgery Management offers customizable preference cards, phase tracking, and quality reporting.

CONFIGURATION TOOLS

Juno EHR's Clinical Content Builder and Build-a-Module offer systemwide, org-governed configuration with graphical, drag-and-drop interfaces—enabling easy customization without coding, extra budget, or delays when needs change.
