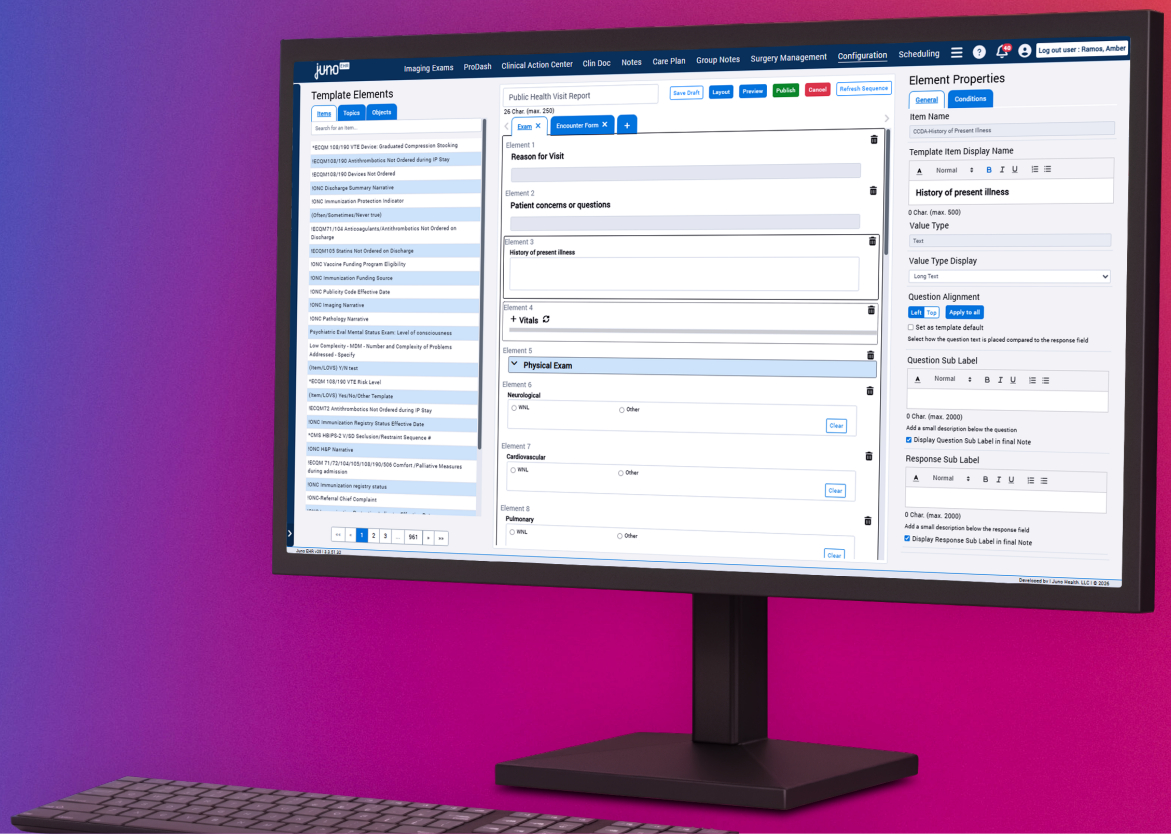
EVERYTHING YOU NEED TO SERVE THE NEEDS OF YOUR COMMUNITIES



Juno Health® provides modern, cloud-native public health solution designed with the end user in mind. Streamlined workflows reduce the documentation burden, eliminate workarounds, and alleviate burnout. Our system was designed by clinicians for maximum usability.

Our modern, ONC certified EHR is designed with HL7 FHIR APIs as a starting point — not a retrofit. It is USCDI compliant to support true interoperability and allow you to seamlessly work with other agencies and interface with outside labs. While our single tenant deployment ensures you are in control of your system and not tied to other organizations.

And Juno EHR for Public Health's standards-based coding elements — including ICD-10, SNOMED, LOINC, and more — can be configured to local code sets as well for easy data extraction, allowing you to monitor population health, track immunizations, and demonstrate compliance, while supporting your higher mission of caring for your community.

REAL REACTIONS. REAL PERSPECTIVES.
See what clinicians and staff who experienced Juno EHR firsthand have to say.

THE JUNO EHR FOR PUBLIC HEALTH DIFFERENCE

These powerful, comprehensive features are designed to make it easier and more efficient for you to provide excellent care, improve population health outcomes, and better serve your community.

CLINICAL CONTENT BUILDER

Juno EHR's Clinical Content Builder lets organizations personalize workflows, notes, and assessments for specific facilities, departments, or roles. Its graphical interface and drag-and-drop functionality make customization simple, avoiding the need for coding, extra budget, or delays.

NATIVE E-PRESCRIBING

Juno EHR's web-based E-Prescribing supports small clinics with medication reconciliation, pharmacy selection, and controlled substance prescribing with two-factor authentication and real-time drug data from First Data Bank. Certified by ONC, DEA, and Surescripts.

AMBULATORY SCHEDULING

Streamlines workflows with a user-friendly interface for appointment visualization. Supports patient preferences, walk-ins, follow-up scheduling, and easy check-in/check-out. Captures key metrics to identify trends and optimize services.

IMMUNIZATION SERVICES

Juno EHR's Immunization Services stores recommendations during patient review. Administered in the eMAR, users can view history and forecasts from registry queries. Historical data and recommendations are saved and documented per encounter.

BUILT TO MEET THE NEEDS OF PUBLIC HEALTH

INTEROPERABILITY

- ★ Supports HL7 FHIR, USCDI, DICOM and CCD/CCR
- ★ Bi-directional integration with outside data sources
- ★ Future-ready API infrastructure

SECURITY

- ★ Zero-trust architecture
- ★ FIPS-compliant encryption
- ★ HITRUST, FedRAMP, and SOC 2 Type II certified

DATA AVAILABILITY

- ★ Real-time data access
- ★ Built-in surveillance tools
- ★ Electronic case reporting

VALUE

- ★ Affordable
- ★ Built-in revenue optimization
- ★ Flexible, modular design allows you to modernize on your schedule

DRUMMOND CERTIFIED ONC HEALTH IT

Healthcare IT is broken. We're fixing it. Juno Health was born because outdated EHRs were detracting from patient care instead of facilitating it. We created Juno EHR to be modern, affordable, and tailored to your needs—building an intuitive system clinicians would actually want to use. Juno Health® and Juno EHR® are registered trademarks of Document Storage Systems, Inc.
